

Test ID	Use Case	Expected Results	Instructions	Actual Results	PASS/FAIL	Out of Scope: Additional Feature Backlog
1.1	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly.	On Desktop, the navigation bar is at the top of the page, and hovering over it highlights the button. This should be the case for Desktop and large tablet devices, and should work on all common browsers.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Move mouse pointer over navigation buttons	Navigation bar is at the top of the page and all colours are inverted as you hover.	PASS	Depending on the page that you are on, keep that page highlighted on the navigation bar in some way to make it clear where you are in the website.
1.2	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly. As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly.	Clicking on HOME, PLANTS, OUR STORY, FIND US takes the user to the correct corresponding page, no matter what page they are currently on. This should work on all viewports and browsers. On both mobile and small tablet, the navigation bar is found through clicking on a burger menu. This should work on both Chrome and Safari, the two most common mobile browsers.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Move mouse pointer over navigation button 3. Click on button	Clicking on all navigation items from all pages works as expected, and directs to the correct page.	PASS	
1.3	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly.		1. Open website on mobile browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Press on top right burger menu	Burger menu is displayed. Clicking on the burger menu shows the menu items, and all menu items work as expected from all pages.	PASS	
1.4	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly.	Clicking on the logo on any page will take the user to the homepage. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Move mouse pointer over logo top left 3. Click on logo	Clicking on the logo at the top left of the page results in being directed back to the home page in all instances no matter which page.	PASS	
1.5	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly.	The footer is found at the bottom of every page. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Scroll down to the bottom of the page	The footer is found as expected at the bottom of every page for both mobile and desktop.	PASS	
1.6	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly.	The footer always shows the Address, Contact Information, and Social Media URLs. This should work on all browsers and all viewports. This should always open in a new tab.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Scroll down to the bottom of the page	Address, Contact Information, and Social Media links were always shown no matter the viewport or the browser used. Clicking these links successfully directed to the associated website. This opened in a new tab each time, and from every page.	PASS	
1.7	As a First Time Visitor, I want to navigate seamlessly through the site so that I can get to the intended page quickly. As a First Time Visitor, I want to know more about the shop and understand their journey. So that I can decide if I want to visit.	All links in the footer work as expected and take the user to the correct page. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Scroll down to the bottom of the page 3. Click on link	All URLs open to the correct pages as expected, including opening a modal pop-up.	PASS	Email address could be updated to be a mailto: URL, which would automatically open the users preferred email software.
2.1	As a First Time Visitor, I want to know more about the shop and understand their journey. So that I can decide if I want to visit.	On the "Our Story" page, the user can read about how the shop was started. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/ourstory.html 2. Scroll to story section	Going to the our story page shows the blurb about the shop, with a timeline. This works on all breakpoints and browsers	PASS	
2.2	As a First Time Visitor, I want to know more about the shop and understand their journey. So that I can decide if I want to visit.	On the "Our Story" page, the user can see a timeline of the business growth and journey. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Scroll to timeline section	The timeline is horizontal on desktop, and vertical on mobile. All elements look signed visually.	PASS	
3.1	As a First Time Visitor, I want to find out what plants are on sale and get advice. So that I can decide which plant is right for me.	On the plants page, the featured plants that are for sale are shown, with a gallery at the bottom to show the full range. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/plants.html 2. Scroll to plants section 3. Scroll to gallery section	On the plants page, there are four featured plants and eight plants shown in the gallery below.	PASS	
3.2	As a First Time Visitor, I want to find out what plants are on sale and get advice. So that I can decide which plant is right for me.	On the plants page, the user can find out about the featured plants by reading a short description. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/plants.html 2. Scroll to plants section 3. Scroll to particular plant	There is a short description next to each of the featured plants.	PASS	All plants could have a description on hover.
3.3	As a First Time Visitor, I want to find out what plants are on sale and get advice. So that I can decide which plant is right for me.	On the plants page, the user can find out about how to care for the plant by looking at the "water" and "sunlight" bars. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/plants.html 2. Scroll to plants section 3. Scroll to particular plant	There are water and sunlight bars next to each of the featured plants. These adjust accordingly for mobile, tablet, and desktop. These work in all browsers.	PASS	
4.1	As a First Time Visitor, I want to know the store's opening hours. So that I can plan when to visit.	On the "Find Us" page, the user can see the information about opening hours in the table showing days of the week and bank holidays. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Scroll to opening hours table	The opening hours are clearly shown on a table on the "Find Us" page. This adjusts in width for mobile and tablet.	PASS	
5.1	As a First Time Visitor, I want to navigate to their social media sites. So that I can follow them.	On the bottom of any page, the user can scroll to the footer navigation and find the social media links. Clicking these links should take the user to the appropriate social media website in a new window with the Plant Palace handle. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/index.html 2. Scroll down to the footer 3. Move mouse pointer to social media links 4. Click on link	Clicking each of the social media icons directs to the appropriate social media website.	PASS	
6.1	As a First Time Visitor, I want to see the store in more detail. So that I know whether I'd like to visit.	On the "Plants" page, the user can see an image of the store, as well as the plants in stock, so that they can decide if they'd like to visit. This should work on all browsers and all viewports.	1. Open website in browser https://polyomax.github.io/Plant-Palace--User-Centric-Frontend-Development-Milestone-Project/plants.html 2. Scroll to introduction 3. Scroll to plants section	The image of the store is clearly shown on each viewport and browser. The plants that are featured and available are shown on the page below.	PASS
